WAREOLOGIE DEBUTS NEW PORTABLE PHYSICAL THERAPY SOLUTION IN COLLABORATION WITH VETERANS' HEALTH ADMINISTRATION

- *Wareologie™ Portable Parallel Bars on wheels revolutionize mobile rehabilitation, delivering physical therapy directly to a patient's bedside*
- *Made possible by a contract awarded by the Veterans' Health Administration (VHA) Innovators Network ([iNet](#)). The VHA is the largest health care system in the world.*

SOUTHFIELD, MI (January 3, 2023) – Wareologie, a certified Woman Owned Business, based in metropolitan Detroit, has developed a first-of-its kind mobile rehabilitation equipment to improve patient and workforce safety and increase physical therapy access sooner in the recovery process. They were awarded a contract by the Veterans Health Administration Innovators Ecosystem and collaborated with clinicians at the Hunter Holmes McGuire Medical Center to design Portable Parallel Bars on wheels. Wareologie™ commercialized the FDA Class 1 device in Michigan, to empower clinicians to deliver vital therapy anywhere.

“What started as a mission to improve patient access has grown to also address patient and workforce injuries” said Gina Adams, founder, and CEO of Wareologie.

“Patient hospital falls, and clinician injuries are a huge problem. Hospitals spend over 3.2 billion dollars in Workers’ Compensation Claims each year. Clinicians administering therapy and transfers represent 54% of those claims.”

The distinct, patent-pending difference are the wheels and foldable design. This makes them easy to transport in hospitals, skilled nursing, and home healthcare settings. Reducing patient transfers may improve productivity and work place safety. This FDA-registered device has the potential to help millions of people nationwide access physical therapy sooner and safer.

Wareologie™ Portable Parallel Bars are proudly made in Michigan and now being prepared to fulfill orders by the manufacturer located in Sterling Heights, MI.
